

## Technical Datasheet

---

# FW-1661 Leak Detector

### Description

FW-1661 is tested by the Danish Gas Technology Centre, and the product has proved to be very suitable for the identification of leaks on among other things copper pipes, steel pipes, PE- and PEM gas pipes.

The product is based on an active foambuilder that is dermatologically tested, and FW-1661 contains furthermore both anionic and cationic corrosion protective agents. PH is adjusted to the neutral area.

FW-1661 is used to localize leaks on pipe joints, fittings, bushes, hoses, valves etc. Bubbles in the applied film indicate the location of a leak.

With its special adhesive additives FW-1661 is easy to work with on vertical surfaces and pipes. The products is also very suitable for exhaust pipes.

### Properties

- for the control of pipesystems
- not flammable
- gentle to the skin
- frostsafe to -15°C
- fast location of leaks
- does not have an effect on subsequently repairs
- does not have an effect on subsequently surface treatment
- does not contain silicone

INFORMATION

# FW-1661 Leak Detector

## Technical and physical data

Partnumber	12875
Packing	Spray
Contents	500 ml
Weight	418 g
Propellant	CO <sub>2</sub>
Base	Lindamide
Colour	White
Flashpoint (conc.)	None
Density at 20°C	1,02 g/cm <sup>3</sup>
Solubility in water	Soluble
